

**WILDLIFE OUTREACH PROGRAM:**

**BACKYARD WILDLIFE**

*When we think of wildlife, it is usually of the plants and animals who live “out there” somewhere – in a forest, lake, or meadow. But there is plenty of wildlife to be seen right in our own backyard or neighbourhood. Here is a project you can do with your class. Start a classroom Bristol board to post photos of the remarkable wild plants and animals you see around you. You will be amazed at the variety!*

*So what exactly IS backyard wildlife? Circle all the right ones!*
